DETAILED ACTION

1. This Office action is based on the appeal brief filed April 16, 2010, for the 10/561589 application.
2. Claims 1-18 are pending and have been fully considered.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Craig Lundell on June 15, 2010.

Please amend claim 5 as follows:

5. The process of claim 1, wherein prior to step (a), the crude derived feedstock is first subjected to a hydrotreating step.
4. The following is an examiner's statement of reasons for allowance: The prior art of record does not appear to anticipate or render obvious the limitations of instant claim 1. The prior Office actions asserted that claimed invention was unpatentable over Bixel et al (WO 97/18278) in view of Germaine et al (WO 02/070630) and Gregor in *Catalysis Letters*. Bixel et al teaches parts a) and c) of instant claim 1, and Germaine et al teaches parts b) and c) of instant claim 1. It was asserted that it would have been obvious to combine the processes [i.e., the products from part a) and part b) and collectively deliver to part c)] in view of *In re Kerkhoven*. However, the decision in the aforementioned case law teaches that "It is prima facie obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition to be used for the very same

Art Unit: 1797

purpose.... [T]he idea of combining them flows logically from their having been individually taught in the prior art." The teaching is not directed to combining two intermediate products and processing them together to obtain a third product. Furthermore, the Office action asserted that it would have been obvious to combine the processes in order to save capital and processing costs as evidenced by Gregor. However, this assertion was false since there would not have been any cost savings, even if a refinery was engaged in both Fischer-Tropsch synthesis and isomerization and crude oil processing. Indeed, there appears to be no teaching or motivation in the prior art for combining the processes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRIAN MCCAIG whose telephone number is (571) 270-5548. The examiner can normally be reached on M-F 8-430.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
